Example slide

This is a subtitle

Here we have some text that may run over several lines of the slide frame, depending on how long it is.

- first item
 - A sub item

Next, we'll briefly review some theme-specific components.

- Note that *all* of the standard Beamer features can be used with this theme, even if we don't highlight them here.

Additional theme classes

Some extra things you can do with the clean theme

Special classes for emphasis

- **important note** — `\alert{}` for default emphasis (maroon)
- **custom colour** — via `\textcolor{umichMaroon}{}{}`
- **highlighted** — via `\colorbox`

Cross-references

- Use `\hyperlink{label}{text}` for internal Beamer links — analogous to the `.button` class
